

CERTIFIED ENVIROSHAKE INSTALLER — ONE OF ONLY FOUR IN YORK, PA

Enviroshake Composite Roofing

A Complete Informational Packet for Pennsylvania Homeowners

Home with a premium Enviroshake composite shake roof, copper-capped dormers and stone facade

THE MATERIAL

What Is Enviroshake Roofing?

Enviroshake is a premium composite roofing system designed to replicate the natural texture and appearance of cedar shake, cedar shingles, and slate. It is made from a blend of recycled polymers, elastomers, and natural fibers — made from 95% post-industrial recycled material — giving it strong durability while maintaining the authentic character homeowners love.

Unlike natural cedar, this synthetic shake roofing is engineered to resist rot, insects, mold, mildew, and moisture damage. It also withstands UV exposure, hail, and Pennsylvania's freeze-thaw cycles, making it a dependable roofing option for homes throughout the region.

THE ADVANTAGES

Why Choose Enviroshake for Your Home?

A roof should do more than protect your home — it should complement its style and provide lasting value. Every claim below is backed by a published manufacturer test standard or certification, not a marketing estimate.

01 Authentic Cedar Shake, Shingle & Slate Textures

Offered in three profiles — Enviroshake, Enviroshingle and Enviroslate — each individually molded from real wood or stone to reproduce the taper, grain and shadow lines of the natural material it replaces, pre-shuffled across multiple mold patterns so no two roofs look mass-produced.

02 UL 2218 Class 4 Impact Resistance

Rated Class 4 — the highest impact rating under UL 2218 — after withstanding repeated steel-ball drop testing without fracturing. Many insurance carriers offer premium discounts for Class 4 impact-resistant roofing.

03 Engineered for High Wind Uplift

Backed by High-Velocity Hurricane Zone testing (TAS 125, Class 90) plus Miami-Dade County (NOA #24-0222.06) and Florida Building Code (FL 16037-R6) product approvals — the same wind-uplift standards used to certify roofing for hurricane-prone coastlines.

04 ASTM E108 Class A & Class C Fire Ratings

Certified to ASTM E108 and CAN/ULC-S107-19. Class A is the highest fire-resistance rating a roof covering can earn, placing Enviroshake alongside slate, tile and metal roofing.

05 Won't Rot, Rust or Feed Insects

Made from inert recycled polymers rather than wood fiber, so there is no organic material for mold, mildew, insects or fungal rot to feed on — no biocide treatments or re-coating over the life of the roof.

06 Fade-Resistant Engineered Color

Color is blended throughout the material rather than sprayed on, so it will not peel, chip or streak as UV exposure and Pennsylvania winters age the roof.

07 Transferable Material Warranty

Enviroshake backs every installation with a fully transferable material warranty — up to 50 years under the Gold-Level tier (requires Enviroshield synthetic underlayment) or 25 years under the Standard-Level tier — protection that carries over if you sell the home.

STYLES & PROFILES

Find the Right Enviroshake Roofing Style

Enviroshake, Silvered Cedar profile — Eagle Ridge Dr.

Enviroshake

Replicates the rustic, hand-split look of traditional cedar shakes, taper-sawn and pre-shuffled across eight profiles for a natural, non-repeating pattern.

Enviroshingle

The clean, uniform lines of cedar shingle roofing, for homes that want the composite's durability with a more tailored, buttoned-up silhouette.

Enviroslate

Captures the timeless, textured elegance of natural slate — a premium profile for historic and high-end architectural styles.

As experienced Enviroshake installers, our team will help you compare available styles, colors, and profiles to find the best fit for your home's design and long-term goals.

CERTIFICATIONS & TESTING

Independently Tested & Certified

Enviroshake products carry the following published manufacturer certifications and test-standard approvals as of this packet's preparation:

Impact Resistance	UL 2218, Class 4 (highest rating)
Fire Rating	ASTM E108 & CAN/ULC-S107-19, Class A and Class C
Wind / Hurricane Zone	High-Velocity Hurricane Zone TAS 125, Class 90
Wind Uplift Approval	Miami-Dade County NOA #24-0222.06
Building Code Approval	Florida Building Code FL 16037-R6
Additional Approvals	CCMC 13105-R · CRRC Product ID 1278-0001 · California BML No. 4175-2114:0100 · Texas DOI RC-534
Material Composition	95% post-industrial recycled material
Sustainability	Contributes to LEED & NGBS credits; Wildland-Urban Interface (WUI) and Wildfire Prepared designations

WARRANTY

Warranty Coverage

Gold-Level Warranty	50 years, fully transferable material warranty. Requires Enviroshield® synthetic underlayment at installation.
Standard-Level Warranty	25 years, fully transferable material warranty. No underlayment requirement.

Installation matters as much as the material: Enviroshake must be installed by a Factory Trained Installer for the manufacturer's warranty to apply. DeHaas Building & Remodeling Co. is one of only four certified Enviroshake partners in York, PA.
